eISSN 2813-415X

Sedimentologica is a community-driven, Diamond Open Access (DOA) scientific journal publishing scientific research across the broad field of sedimentology for free. This includes all types of sedimentary processes, methods, deposits, and environments. Regardless of spatial and temporal scales, on Earth or any other planetary body. The published material is free to share without an embargo period, and the authors will retain the copyright. *Sedimentologica* is driven by the community for the community as part of the broader DOA movement in geosciences. *Sedimentologica* provides direct and equal access to science for all citizens, scientists, and institutions all over the globe. This journal is defined by the principles of Open Science to promote the ethical dissemination of science and knowledge according to high standards of equity, diversity and inclusion.

This issue includes:

***Sadid, N.** (2024). Sand dune migration and flux into the lower Helmand and Arghandab valleys. <https://doi.org/10.57035/journals/sdk.2024.e21.1085>

Soutter, E., Martínez-Doñate, A., Kane, I., Poyatos-Moré, M., Taylor, W., Hodgson, D. M., Bouwmeester, M. J., & Flint, S. (2024). Exceptional preservation of three-dimensional dunes on an ancient deep-marine seafloor: implications for sedimentary processes and depositional environments. <https://doi.org/10.57035/journals/sdk.2024.e21.1067>

Soutter, E., Martínez-Doñate, A., Kane, I., Poyatos-Moré, M., Taylor, W., Hodgson, D. M., Bouwmeester, M. J., & Flint, S. (2024). Corrigendum to "Soutter, E. et al. (2024). Exceptional preservation of three-dimensional dunes on an ancient deep-marine seafloor: implications for sedimentary processes and depositional environments". <https://doi.org/10.57035/journals/sdk.2024.e21.1475>

Simon, E., Gindre-Chanu, L., Blanchet, C., Dupont-Nivet, G., Martinez, M., Guillocheau, F., Ulrich, M., Nutz, A., Vogel, H., & Schuster, M. (2024). Lacustrine rhythmites from the Mulhouse Basin (Upper Rhine Graben, France): a sedimentary record of increased seasonal climatic contrast and sensitivity of the climate to orbital variations through the Eocene-Oligocene Transition. <https://doi.org/10.57035/journals/sdk.2024.e21.1222>

Laskar, J., Farhat, M., Lantink, M. L., Auclair-Desrotour, P., Boué, G., & Sinnesael, M. (2024). Did atmospheric thermal tides cause a daylength locking in the Precambrian? A review on recent results. <https://doi.org/10.57035/journals/sdk.2024.e21.1271>

Daxer, C., Wils, K., Ramisch, A., Strasser, M., & Moernaut, J. (2024). Contrasting sedimentary and long-lasting geochemical imprints of seismic shaking in a small, groundwater-fed lake basin (Klopeiner See, Eastern European Alps). <https://doi.org/10.57035/journals/sdk.2024.e21.1296>

Hilderman, R., MacDonald, J., Griffin, S., Slaymark, C., Einsle, J., & Monaghan, A. (2024). Heterogeneous lithification across a legacy coastal slag bank: the creation of new sedimentary rock from anthropogenic material. <https://doi.org/10.57035/journals/sdk.2024.e21.1318>
